Patent No. 6617115;
GENERAL INFORMATION:
APPLICANT: Wood, Kenneth
APPLICANT: Finer, Jeffrey
APPLICANT: Beraud, Christophe
APPLICANT: Mak, John
APPLICANT: Sakowicz, Roman
TITLE OF INVENTION: Methods of screening for modulators of
TITLE OF INVENTION: cell proliferation and methods of diagnosing cell
TITLE OF INVENTION: proliferation states
FILE REFERENCE: CYTOP033;
CURRENT APPLICATION NUMBER: US/09/428,156B;
CURRENT APPLICATION NUMBER: 1999-10-27;
NUMBER OF SEQ ID NOS: 10
SOFTWARE: FastSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ; TYPE: DNA
